

CrystaLatch™ 1x6 Fiber Optical Reflection Switch for LIDAR Sensor Applications (SM, PM, High Power)

(Protected by U.S. patents 7224860, 6757101, 6577430 and pending patents)

Product Description

The CL 1x6 Series Fiber Optical Reflection Switch connects optical channels by redirecting an incoming optical signal into a selected output fiber at the same time collect the reflected signal into a dedicate sensor port. This proprietary configuration is designed for sensor and LIDAR application, minimizing optical loss and eliminating the need for additional circulator or coupler. The switching is achieved using patented non-mechanical configurations and activated via an electrical control signal. Latching operation preserves the selected optical path after the drive signal has been removed.

This series of reflective switches are designed to meet the most demands of continuous operation without wear-out, longevity without fail, and live operation under vibration/shock, as well as -40 °C operation. Electronic driver is available for this series of switches.

Performance Specifications

CL 1x6 Reflection Series Switch	Min	Typical	Max	Unit
Operation Wavelength ^[1]	1520	1550	1580	nm
	1295	1310	1325	
Insertion Loss ^[2]		1.2	2.0	dB
Cross Talk ^[2]	40	50		dB
Return Loss ^[2]	50	55		dB
PDL (SM Series Switch only)		0.15	0.25	dB
Extinction Ratio (PM Series Switch only)	18	25		dB
Directivity ^[3]	45	50		dB
PMD (SM Series Switch only)			0.2	ps
Switch Speed (Rise, Fall)	5	50	200	µs
Repetition Rate		2K		Hz
Durability	10 ¹¹			cycle
Optical Power Handling	High Power Series Switch	3	5	W
	Others	300	500	mW
Switch type		Latching		
Operating Temperature ^[4]	-5		70	°C
Storage Temperature	-40		85	°C
Fiber Type	SMF-28, Panda PM, or equivalent			
Package Dimension	72L x 37W x 7.8H			mm

[1]. Same specs switches at L band are available, please contact us.

[2]. Measured without connectors.

[3]. Defined as the optical power at the sensor port when light is launched into the input.

[4]. Operating temperature -40-85 °C version is available as special.

Features

- High Speed
- Non-Mechanical
- High Reliability
- Fail-Safe Latching
- Low Insertion Loss
- Rugged
- Compact
- Cost Effective
- Direct Low Voltage Drive

Applications

- Optical Sensing
- Optical Signal Routing
- Instrumentation

CrystaLatch™ 1x6 Fiber Optical Reflection Switch for LIDAR Sensor Applications

Mechanical Dimensions (Unit: mm)

Electrical Driving Information

Each switching point is actuated by applying a voltage pulse. Applying one polarity pulse, one light path will be connected and latched to the position. Applying a reversed polarity pulse, another light path will be connected and latched to the position after pulse removed.

Parameter	Minimum	Typical	Maximum	Unit
Resistance (each group)	15	18	22	Ω
Switch Voltage	2.25	2.5	2.75 [1]	V
Pulse Duration	0.2	0.3	0.5	ms

[1]. Over this value will damage the device.

- 1) Driving kit with USB or RS232 with Windows™ GUI or TTL interfaces is available.
- 2) Driving table can be provided per request for the customers to design/build their own driving circuit.
